

Update Neema, June 30th, 2020

I am fine and also my family are fine! Covid-19 was the challenge in my studies because we loose a lot of time to sit at home for 3 months. The measure that our government take is to avoid populations, avoid sitting in group of people without mask because covid spreads through air.

My results: I will send it after the next exams that can make me to enter to the second year.

I am happy. I also hope you're all fine! God bless you thank you.
