

Dear donators,

I trust you are doing well. I am doing well in school.

My third year started in November 2021 and will end hopefully in October 2022.

The major challenge I have faced so far is studies halting due to a strike action in January by all university lecturers nationwide but they resumed in mid-February and lectures have been going on smoothly since then.

School has been good. Most of the Covid-19 restrictions have been minimized. We have full access to all school facilities and even the hospital. The third-year course content is quite voluminous and demanding (as expected) but I am not overwhelmed by it. I have increased my personal learning time and my study group helps as well. This routine has been beneficial so I will maintain it.

I am grateful for your donations. It has been very helpful. I pray you stay healthy and safe.

Kind Regards,

Mintah S. Angelina
