

To my foundation,  
Istepup foundation.

Mwanza, Tanzania, 29-03-2022

Dear sir/madame,

Have my greetings to all member or students in the family of love of Istepup and our sponsors, I would like to say thanks to everyone of you to make our dream come true in the future by helping us to be happy and being the best in our community and help them back.

My apology of not sending an information on time but today I make my best before the time in which they ask us to give out an information.

My update: I am now doing good at school. It was good for me to be back again in school, because I am proud to study so that I can help my community and saving people's life. I am now doing my examination of the end of semester so that I can go to semester two. I will send my result in a few weeks after I am done with my exams. But in my grade am doing good I hope it will be nice to you all.

My life it's good and better, but a little complication can happen because I am not getting paid to play football anymore. It's a bit difficult to find a job in the street after school hours, but also I have to pay for the school fees of my young brothers. Might I say its hard to find a job in our country.

My life in general I am doing good again, I am still playing football as a workout with my friends. Some weeks ago I was in a road traffic accident but I make it out without any problems. I am now renting a house in few miles from my school.

On the 5<sup>th</sup> of April we are going to start the new semester to finish the second year, I was asking if you already pay the school fees so that I can inform them, so that I can go and make sure they give some pay slip and keep them.

All in all I can say thanks to everybody, specially Dr. Rian Jager, who inspired me not to lose hope and now I stand again to start over and I hope I will make it. I will never fool again and again.

Thanks to my foundation again I won't let you down I promised to my self to be the best.

Kind regards,

NELSON NOVART LWOMILE.

ISTEPUP STUDENT.
