

Dear donators,

I hope you are well.

I am in my fourth year now which means I have started my clinical rotation. This is made possible by your donations and I am grateful.

Classes will officially start on the 16th of January and end on 20th of October 2023.

I know it gets tougher as we ascend but I believe this period is preparing us for the working field. In all, I am excited about this new phase.

I have picked up an extra- curricular activity. I am part of a foundation that embark on outreaches every year. Last year we met with girls between 12- 18 years (junior high and senior high school girls) to educate them on unsafe reproductive health practices, career choices and also donated sanitary towels to them(donated by friends and some health workers). It was a great experience. I hope to join them this year.

I will keep you posted on how the year goes.

Once again, I am grateful for your donation. It has kept me going. I pray you stay healthy and safe.

Happy New year!!

Kind Regards,

Angelina S. Mintah
