

My first Year in Collage: I enrolled in Tonkolili District College of Health Science. My friends told me college was not child's play. I was giddy with anticipation, inner joy and expectations for a bright future. I will not forget my first day of college, it marks a shift from one life to the other. It keeps coming back to me with the strange and new sights and experiences. I got up early and prayed the dawn prayer before getting ready for college. College was a new universe for me. It has a beautiful structure, professional teachers and liberal environment where I have flourished. We have had two semesters and exams which I have passed with flying colours. We have covered foundations of nursing introduction to human anatomy and physiology, surgical nursing, nursing process and more. We have also completed placement in the hospital where we can learn how to live our life in the future. I have not abused the privilege of placement and I have used the opportunity fully to learn and pursue my goal.

The best thing is answering questions in class! I reach home with a smile every day. Thanks Almighty God I have been given the chance to become a nurse, with a big thanks to the I Step Up Team.
