

Update Adriana Jeremiah September 2023

I would like to give you more thanks for supporting me. During second year I studied the following modules: care of women in normal labour and puerperium, which involves delivery, pre-referral management of a women with abnormal pregnancy, labour and puerperium, care of a normal new born, management of communicable disease, community of health nursing. I also got more skills especially in practical so now I can give care to the patient according his or her condition also according to my skills. On 14 October 2023 I will join third year, so I beg you to continue with supporting me so that I can achieve my goal.
