

## Update Chanique Read – January 2024, Graduated!

I can say with great pride, but also with gratitude, that I graduated as a nurse. The training and everything around it have helped me get to know a better version of myself. I also learned to deal with different types of human characters and feelings.

The best moment of all is when I had to take my oath. It made me emotional because I finally saw my dream come true and I wish that my mother, whom I lost along the way from studies, would have been there. But I know she is with me in spirit. She would be very proud and she would motivate me to continue studying, which I really want to do now.

Finally, I would like to thank the foundation again for what they have meant and done for me.
