

REPORT FOR ACADEMIC PROGRESS: FOURTH YEAR, FIRST SEMESTER (THEORY AND CLINICAL ATTACHMENT)

Greetings,

I hereby write to give you update on academic progress I have addressed for year four, first semester of my study. This update will include theory (class learning) and practical experience (clinical area).

Fourth year, first semester

The semester had 25 weeks, 11 weeks of class learning and 14 weeks of clinical allocation, commenced in April, 2023 end on late October 2023. The semester had only on course which was midwifery science one.

Class learning

Class learning during the semester was such a success. In the 11 weeks of lectures and other modes of class learning, I have gained more advanced knowledge and skills on how to render the care to a pregnant woman during Antepartum, Intra-partum and Postpartum period. Besides I have been updated with new knowledge in my midwifery career.

Clinical allocation

In the first semester of fourth year, I was allocated at Thyolo district hospital to practice the midwifery care. I was allocated in labour ward for 6 weeks, postnatal ward for 4 weeks and antenatal ward for 4 weeks and all the objectives and competencies were achieved accordingly.

Other things to report

I would like to notify the organization that I'm now in Phalombe District hospital for clinical allocation of midwifery science 2 and Neonatology and the allocation will end in June 2024.

I would also to notify the isteup that this is our last semester of academic and will graduate in September this year.

Furthermore, I would like to notify the organization that the results for midwifery science one are out and attached is the document of the result. (*check highlighted courses MDS4701CN Clinical Midwifery Science I MDS4702N Midwifery Science 1*)

I would like to make an apology to the isteup for not sending reports in time. The main reason for that is that I don't have a smartphone and computer that I can use to write or sending the reports.

Lastly I would like to thank isteup for the support.

Yours

Christopher Mbeko
