Dear iSTEPup Foundation,

My Studies are going great. I have been actively participating in class discussions and leveraging online resources to supplement my learning. Teachers too have been playing a very vital role by providing us with good learning materials, attending lectures and providing us with assessment tests. Together with my own private studies, reading from other sources during my revision, I must admit that it has been so well and the whole learning process has been so enjoyable. We did an examination where I performed well and I have sent a copy of my results too.

Above all, I can not stop to express my heartfelt gratitude for your generous sponsorship. Your support has not only eased my financial burden but has inspired me to work harder in my studies. Because of your tuition assistance, I can continue to pursue my educational goals without the weight of financial stress. Your belief in my potential is both humbling and motivating. I am deeply appreciative of your contribution to my future.
