MY SECOND YEAR EXPEDITION

I have written this report to express my gratitude for what you have been doing for me since September,2024. I am very grateful for it and I am really pleased to have your help. I launched my second year in September,2024. My first semester of second year was of about 17weeks, I was doing both practical and theory part. I was allocated at Malamulo Adventist Hospital for 12 weeks. I had to work at pediatric, medical, surgical, gynecological and obstetric ward, three weeks at each department. Upon finishing my clinical rotation, I had to seat for end of semester examination for two weeks, by the grace of God I passed my end of semester examination.

Second semester of my second year started in February this year, we had a lot of training in this semester. We did Sexual Transmitted Infection training in our first week, Emergency Training and Triage in second week, Anti-retroviral training in our third week. It was really nice training as such I gained practical skills of how I can manage emergencies.

Currently I am in my clinical allocations, I will work at district hospital for 10weeks then I'll go for psychiatry training for two weeks, I will also do health center management for four weeks and then I'll have to write end of semester examination.

Your support has made me to be a hard worker, I always focus on my academics without issues because I know that you always fill my financial gaps. Thank you for your support and kindness, God should bless and reward iSTEPUP.
