

Student update Kadiatu Tholley – April 2025

First of all I want to thank iSTEPup and God for my past education because it brought me to the present and points me towards the future. My past academic year was tough and challenging but with the help of this organisation I am proud to say I am progressing.

Here is a list of the modules I am offering: - Anatomy and physiology 1&2. - Fundamental of nursing 1&2. - Introduction to Medicine and Surgery. - Community Health Nursing. - Behavioral Sciences. - Nutrition. - Communication Skills and Information Communication Technology (ICT). - Biochemistry. - Psychology. - Reproductive Health. Pharmacology. Microbiology.

I have passed all these modules successfully and now I am in year two(2) offering State Registrar Nurse (SRN) all thanks go to iSTEPup and God almighty for making it possible through your financial support you have been rendering to me, once again thank you so much.

I will like to make this promise that I will not let you down I will continue to study hard to make this a reality and pass all my modules with flying colours. I have grown up as a person through the hard working lectures that have contributed to make me and my colleagues come this far to the next level we want to thank them as well. I have developed some new skills in this field I have chosen to become a nurse and help my country and the world at large through these skills I am learning which have made me to be more mature in the way I am dealing with people. I am kindly asking for your continued support so my colleagues and myself may be able to complete our dreams of becoming nurses and in turn we may be able to contribute to the health system in our country Sierra Leone and the world as well.

Thank you so much for what you have done for us and what you are about to do for us in the future. May God continue to bless and keep you all.

Yours faithfully

Kadiatu Tholley
