

Student Update Loveth Freeman – April 2025

Loveth Freeman

3rd Year, Final Year of State Registered Nurse Training

Candidate number 378

Dear I Step Up Foundation Team,

I have worked hard this year to come up with my grades and progress to the last part of nursing school. The training is very hard work but it needs to be. The classes and the teachers and good and my class mates are very good supporting each other. My favourite learning is always in the hospital where I learn from patients and the other registered nurses. It is the best way to learn how the science in the class room appears in real life on the job. I really like to talk to patients and understand them and help them understand their illness. I think I am getting more confident working in the wards with the sick patients and meeting the emergency cases that come to the hospital. I will always want to learn more to make sure that I am being the best nurse that is possible for the patients who come to the hospital and I will keep learning for my whole career as a state registered nurse.

Thank you to all the sponsors and the people that have supported me in the college and in the hospital. It is too hard to pay and work and study for this vital qualification without all of the help and support I have received so I am always going to be grateful and I will never forget you all.
