

My name is Potentinius Adrabet Bahati. I started my Bachelor of Medicine studies in 2024, and I expect to complete my studies in 2029.

In my first year, I started well, and I thank God that I also completed it successfully. I had already shared my results, and I will continue to share them. This year I have entered my second year, and I am still progressing well with my studies.

Currently we are in community field and Health Management and Development system. I will also share updates on these. We are still continuing, and we finished last week. Honestly everything has gone very well so far.

I would like to sincerely thank you, dear iStepUp, for your great support in continuing to help me. May God bless you abundantly in your lives.

Kind regard

Pote
