

Student update: Funny Nyomborowa

March 2026

Over the past year, I have remained focused and committed to my studies in the Bachelor of Science in Nursing and Midwifery program. I have been actively attending both theoretical classes and clinical practical sessions, which have helped me improve my understanding and skills in patient care. Through my training, I have gained more confidence in performing nursing procedures and working with patients under supervision.

Currently, I am still in the clinical area for my practical training, where I continue to gain hands-on experience and strengthen my clinical skills. This exposure has greatly contributed to my growth as a student nurse.

Despite facing some challenges, including limited access to resources at certain times, I have continued to work hard and stay determined to achieve my academic goals. I have been able to adapt and remain consistent in my studies, ensuring that I keep up with coursework and clinical requirements.

At the moment, I am in Semester 4, and the semester is still in progress. I am preparing for my end-of-semester examinations, which are scheduled to begin in the second week of April. I expect to receive my results at the end of April or in the first week of May, and I will submit them once they are available.

Looking ahead, my goal is to continue improving both my academic performance and clinical competence. I plan to dedicate more time to studying, practicing clinical skills, and seeking guidance where necessary. I am committed to successfully completing my remaining semesters and graduating in August 2028 as a qualified nurse and midwife.

I am very grateful for the support provided by iSTEPup, which has allowed me to continue my education and move closer to achieving my career goals. May God increase your territory!

Regards

Funny Nyomborowa
