

Hello everyone!

Greetings from Kabanga, Kasulu District, in Tanzania. I am moving on well with my studies. Unfortunately, this year I could not live in the university's hostel anymore, because they have decided to use the building for something else. The university is building another one, but that will take a long time. In the meantime, I had to find a room to rent outside the campus. Luckily I found a classmate who was in the same situation and we have rented a room together. We are now staying a bit far from the university though, every day we have to take public transport to get to school. I really hope that they will finish building the new hostels this year.

I am happy to share that I did well in my examinations of continuous assessment 1 (CAT 1). My results were as follows: Pharmacology and Therapeutic B, Pharmaceutical Organic C, Microbiology B, Law and Ethic B, Medicine and Medical Supply A, Rational Use of Medicine A. For test two (CAT 2), I obtained: Pharmacology and Therapeutic B, Pharmaceutical Organic B, Microbiology C, Law and Ethic B, Rational use of medicine B, Medicine And medical supply C. I wish to do even better during the end of semester exams, which are scheduled at the end of March 2026. What I need, is for iSTEPup to keep on assisting me so that I can reach my goal. Thank you so much for everything thus far!
