April 10, 2026

Dear I- StepUp Team,

May I take this opportunity to express my gratitude on the support you are giving me to pursue my educational goals, by paying my tuition fees especially for past academic year 2025-2026. And am truly thankful for such an opportunity.

The 2025-2026 academic year, was a year I did my third year at the university having gone through first and second semesters respectively, comprising both class and clinical allocations. Along the way I gained skills, and professional ethics in as much as nursing is concerned with some challenges but they did not prevail.

I have spent some good hours in classrooms internalizing the theories and concepts at large, but I also had the chance for clinical practice; for hands on experience under clinical supervisors who have been supportive as well, sharpening our skills and confidence in the course of our learning, I had good and meaningful interaction with fellow students as well.

The coming academic year will start in June 2026 if there will be no changes, am looking forward to this academic year as am waiting for examination results to out anytime in between this space. So the fourth year being the final year we are expected to learn more about Midwifery and other associated courses.

Once again, I thank you for your support and encouragement sincerely, despite few challenges I may face I remain grateful to I StepUP programme for the timely assistance for the assistance you have given me.

God bless I StepUp.

Yours faithfully,

Chancy Mtambo.
