

REF: TO LET YOU KNOW THAT I'M NOT PROGRESSING WITH STUDIES NOW UNTIL NEXT YEAR

My name is Julian Angelo Rwiza medical student at Padre Pio Collage of health and allied science (PPCOHAS) pursuing diploma in clinical medicinescie and this is the third year of my studies.

The aim of writing to you this letter is to inform you that i'm not progressing with my studies due to the reason that i was late during the beginning of the semester and this is because my dad was sick got a motorcycle accident and i was the one taking care of him during the all time of his recovery so when i turned back to collage i found they had already started studying , and I was told that I could not continue because I was late. I tried to speak with the college principal, but it was not possible for me to rejoin the class at that time. However, he advised me to take my certificate first, and later I will be able to upgrade to a diploma.

Now I'm waiting for the certificate to be out so that i can be volunteering at any health center and then next year i'll be back for my studies to complete the diploma. The collage fee is still being pended at the collage so when next year i turn back to college it will be used no need for payment ot other fee because it's already paid and is not yet being used

Yours faithfully

Julian angelo rwiza
